

ABSTRACT OF THE DISCLOSURE

SYNTHESIS OF BIURETS AND ISOCYANATES WITH ALKOXYSLANE FUNCTIONS, FORMULATIONS CONTAINING SAME AND USE THEREOF

5      The invention relates to a composition and a method of preparing one such composition and an isocyanatoalkoxysilane; the polyisocyanate composition contains at least two different oligomeric compounds

10     comprising at least three units and at most five units selected from aminoalkylsilane units and diamine units and at least one function selected from isocyanate functions and from those derived therefrom, the aforementioned compounds having at least two

15     aminoalkylsilane units and another compound having at least two diamine units; the invention is suitable for coatings.
